Investing in the Next Generation

All juniors and seniors are invited to participate in the CCS Internship Program. Selection is based on quality of student application, GPA, and confirmation of being on track for graduation. First, students must complete the College & Career Readiness semester-long course that includes a series of professional development activities. For internship placement, students must complete an online application before being connected with one or more possible site placements, go through an interview and onboarding process. Interns are then selected and placed for one or two of their class periods with a local business or organization.

Questions?

If you have questions about internship participation or hosting an intern, please contact:

Purpose of Internships

The CCS Internship Program works with the local professional community to design meaningful positions for high school students, to provide them each a preview of their professional future. By working alongside employees in a specific industry, student interns gain enthusiasm for a possible career while also acquiring the skills and expertise needed to succeed in the workplace. They can then showcase these newly acquired skills on their resumes and LinkedIn profiles.
